

## Ekobit – company profile

Ekobit is an independent software and consulting company specializing in providing ICT services and solutions using Microsoft technologies and platforms. Founded in 1992, Ekobit has gained considerable international experience in consulting, project management and application development in various vertical industries.

Our mission is ensuring our partners have the possibility of prompt implementation of all technological achievements in order to remain competitive in their business environments. Numerous projects developed for major customers, such as Microsoft , Splitska Banka–Société Générale Group, Lexware GmbH, MOBA AG, Fr. Sauter AG, to name a few, demonstrate the quality and successful long-term cooperation we accomplish with each of our clients. The key role in this belongs to our experts, carefully selected and continuously educated, offered the opportunity of becoming certified top level experts in ICT consulting. Our experts are quite well known and recognized lecturers at many ICT conferences, e.g. TechEd Europe and Microsoft WinDays in Croatia.

### Ekobit portfolio

- consulting services
- technology workshops
- development teams
- ready solutions

Consulting services and technology workshops are delivered by our high class technology experts. We provide top level consulting services for Microsoft technologies, guaranteed by our experience in using them, such as **Team System Server**, **BizTalk Server**, **.NET** and **ASP.NET**. In order to enable our customers prompt technology evaluation in their business environment, we have developed a series of "proof-of-concept" projects named *Ekobit Services In a Box*. With the Ekobit Services In a Box project, customers can, in short time and with low budget requirements, examine whether specific technology can be successfully implemented in their environment. In such a manner, the risk of implementing new technology is minimized and, from the very beginning, the prospect of successful project conclusion is built up.

Ekobit suite offers the following "in a box" projects:

- Visual Studio Team System In a Box
- Enterprise Integration In a Box
- Portals In a Box

Project realization, in cooperation with the customer, is executed by our development teams, along with project managers and solution architects. Project realization guarantees implementation completion according to specifications, the budget and estimated time periods.

Ekobit also offers ready applications, such as **Test Manager**, **TeamCompanion** and **List Pending Changes Browser**.

## Certificates

Since 2002 Ekobit is a Microsoft **Gold Certified Partner**, the highest partner status an independent ICT company can achieve in cooperation with Microsoft. Through the Microsoft partnership we realize common projects, most frequently in financial markets.

Most of our employees have certificates required for various technologies. Particularly notable are the ones in project management department, such as **Project Management Professional (PMP)** or acknowledgement awarded to several high class experts under strict conditions, such as **Most Valuable Professional (MVP)**.

In the beginning of 2007, Ekobit became a **Microsoft Visual Studio Industry Partner (VSIP)**, on account of professionally developed applications which represent an upgrade for the main development tool of Microsoft platforms, the Microsoft Visual Studio.
