An Enterprise Application Lifecycle Management Company

For more than 20 years we provide products and services for software development teams worldwide, helping them to define, develop, integrate and test business applications.

About Us

Our mission is to deliver enterprise-class products and services to our customers, while increasing their organizational efficiency and productivity. Products and services we offer range from **technology consulting and training** in areas of Application Lifecycle Management (ALM), portals and Enterprise Application Integration, **development of PC and mobile business solutions** to **packaged solutions and products**.

Our Products

Innovative products are at the core of the Ekobit portfolio. They represent our extensive experience in the fields of Test management, ALM and application development.

BizDataX is an innovative data masking platform used for testing scenarios. With unparalleled flexibility in creating complex data masking configurations and numerous predefined data masking packages, BizDataX makes a perfect fit for data security aware enterprises.

TeamCompanion is a Microsoft Outlook Add-in that links Outlook with Team Foundation Server providing better collaboration, efficient Agile Project Management and increased productivity within the software development process.

Our Services

The services portfolio is built upon decades of experience in project management, development and integration of complex IT systems.

Technology Consulting

- ☒ In the area of **Application Lifecycle Management (ALM)** consulting is focused on how to reduce cycle times, eliminate waste and enable a continuous flow of business value within the application development process using MS Visual Studio Team Foundation Server.
- ☒ **Intranet portals** consulting focuses on solutions that integrate dispersed information using MS SharePoint Server.
- ☒ **Enterprise Application Integration (EAI)** consulting focuses on plans, methods, and tools aimed at integrating isolated business applications in an enterprise MIS using MS BizTalk Server.

Custom Development

- ☒ Custom software development service covers a variety of platforms and programming languages including C#, C++, JScript, ASP.NET and mobile platforms like iOS, Android and WP8, to name a few.

Education

List of the **Trainings and Workshops** that we provide:

- ☒ TFS Workshops
- ☒ BizTalk Workshops
- ☒ SharePoint Workshops
- ☒ .NET Workshops

Competences and Certifications

Professionalism and quality are our main competitive advantages. That is why competences and certification are so high on our agenda. We are proud of our four MVPs, two Visual Studio ALM MVPs, a Virtual Machine MVP and a Visual C# MVP, but also of the fact that all of our employees hold at least one of the Microsoft technology certificates like MCT, MCITP, MCTS, MCSE and MCSA. There are also a number of certified project managers in place.

Industry Affiliations

Ekobit is **Microsoft Gold Certified Partner** since 2002. In 2007, we became a **Microsoft Visual Studio Industry Partner (VSIP) Alliance Member**.
